# GMUHLING

### **ALU IN FIRE!**

## FIRE TEST

#### Passed with flying colours!

Together with the local fire brigade GMÖHLING has tested the fire behaviour of our 2401 data disposal container made of aluminium and a normal plastic container.

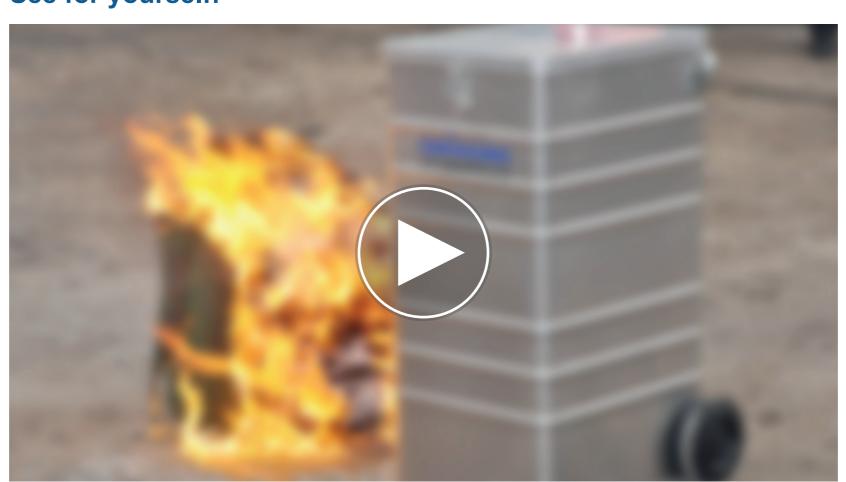

The data disposal container successfully completed the test, only a little soot was visible.

#### See for yourself:

All our GMÖHLING disposal containers are made out of aluminium. For this reason your confidential data is protected and it can be transported to the professional data destruction easily and securely!

We will take our time for you and your questions! Contact us!
