Product catalogue
Version 2022

When quality is the deciding factor

„Made in Germany“ identifies Gmöhling as a medium-sized family business at our premises in Fürth, Germany. We have been developing and manufacturing our quality products exclusively in Germany for over 80 years. The name Gmöhling stands for quality and durability.

In 1948 Gmöhling designed and built the first foldable aluminium box worldwide for the Berlin Airlift.

Conception, development and production in Germany is still feasible today. We have highly qualified, internationally experienced employees, creative minds in our development and construction departments and optimally trained personnel in our manufacturing area.

We place a great deal of value in modern, economic production processes. Thanks to our many years of experience and proven innovations, we are recognised for the development and manufacture of high-quality aluminium products made to customer's requirements worldwide since 1941. It's not surprising that our share of exports is over 50 percent – even to countries known for low manufacturing costs.

What you can expect from us:

- High degree of flexibility due to the traditional strengths of medium-sized companies
- Personal support by a contact partner assigned to you
- High level of knowledge of industry-specific requirements
- Short response times to special customer requirements
- Unbureaucratic, short-term application possibilities
- Manufacturing of small or large scale series
- Development of individual solutions

Aluminium – perfect for all application areas

Light, robust, reliable.
And recyclable.

Very light weight, but also long-lasting and shape-retaining, as well as weather- and corrosion-resistant – these are the properties that make aluminium an optimal material for transport, storage and logistics of all kinds. It is also perfectly recyclable and has a favourable effect on the energy footprint.

Gmöhling transport containers made of aluminium are resistant and easy to clean. This makes it ideal for all applications where demanding requirements with regard to hygiene, reliability and durability need to be met.

Applications

- Logistics & intralogistics
- E-commerce
- Healthcare
- Data disposal
- Textile industry
- Laundry
- Pharmaceuticals & chemistry
- Industry
- Outdoor & leisure
- Packaging & more
- Film & theatre
- Valuable goods

Lightweight and flexible

Electrically conductive

Stable, durable and dimensionally stable

Weatherproof and corrosion-resistant

Resistant to temperature fluctuations

Hygienic and odourless

Magnetically neutral

Easy recycling

The ideal material, very versatile

What do rubies, mobile phones and the moon have in common?

Aluminium, what else?

Atomic number: 13
Symbol: Al
Atomic mass: 26.981539
Melting point: 660.37°C
Boiling point: 2,470°C
Specific gravity: 2.6989 (20°C)
Value: 3
First produced:
1825 by the Danish scientist Hans Oersted

The advantages of aluminium as a material

More and more uses for aluminium have arisen over the last few decades. And all of us benefit in many ways from the properties of the metal.

Aluminium, the material that fascinates!

We are not just fascinated by the impressive appearance of this material, but rather by the physical and chemical properties of aluminium, the 13th element on our periodic table and one of the most common metals on Earth.

It is hard to imagine industry and households without aluminium products. Aluminium is indispensable, especially in the catering sector, the chemical and pharmaceutical industry, the aerospace sector and in service companies with high standards of hygiene, such as laundry facilities, hospitals and care homes. Aluminium containers are now standard in the logistics, transport and disposal sectors.

Since the company's early days, Gmöhling has chosen to use this brilliant material and manufactures aluminium containers in virtually all shapes and sizes for all industries on a daily basis.

Maximum transport capacity

with a minimal net weight

The versatile Gmöhling transport trolleys are available in different sizes and versions. Standard versions include trolleys with smooth, ribbed, perforated and anodised walls.

An essential feature of our transport trolleys is the cut side wall and the fold down or slide down front panel for ergonomic loading and unloading.

We offer various wheel systems according to the load weight to guarantee easier handling.

We can also supply the trolley with an appropriate lid, or in your required size.

Advantages of the G[®]-TRANS

- For universal use
- Hygienic, odourless and corrosion-resistant
- Robust and dimensionally stable with a low net weight
- Beading provides stability and rigidity
- Easy handling and ergonomic, even at maximum load
- Many versions with different load capacities
- Extremely stable design due to metal joints with the latest technologies
- Swivel castors with brakes in accordance with European standard EN 1757-3

Transport trolley
G®-TRANS D 3008

Material: aluminium

G®-TRANS
D 3008/415 | Lid

- Smooth surface
- Closed trolley walls
- All-round, extremely stable rim profiles at the top and bottom ensure a durable trolley design
- Walls and aluminium profiles are interlocked by means of clinching, making them extremely stable
- Walls reinforced with all-round trapezoidal beading (rib)
- Stable undercarriage support made of galvanised steel
- Galvanised steel wheel housing, non-marking solid rubber wheels, roller bearings and thread guards
- Wheel arrangement B, D or A

G®-TRANS
D 3008/235

Wheel arrangement B:
2 swivel castors with
brakes and 2 fixed
castors

Wheel arrangement D:
4 swivel castors,
2 of which have
brakes

Wheel arrangement A:
2 swivel castors and
2 fixed castors, arran-
ged in a rhomboidal
position

Model:

Transport trolley G®-TRANS D 1539

- With a front panel, up to 2/3 of which can be folded down
- 2-part lid with 2 straps and 2 toggle fasteners
- Galvanised steel wheel housing, wheel centre made of polypropylene (Supratech), thermoplastic rubber tread, grey and non-marking, precision ball bearings

2-part lid for easy and safe work

Extremely low fold down front panel for easy loading and unloading

Drain holes with drain valve, plug and chain

TIP

- Also with an all-round, flexible and abrasion-resistant PVC bumper on the lower rim of the trolley, protects the trolley, walls and doors
- Extremely low fold down front panel for easy loading and unloading
- 2-part hinged lid for easy and safe work
- Handles enable easy handling at maximum load
- Very quiet and low contact resistance

Maximum transport capacity with a minimum net weight

This is what distinguishes our hard-wearing and durable transport trolleys.

The lightweight and robust transport trolleys can be used on all sides for storage and transport in your logistics. They have proven their reliability for decades in many sectors, such as industry, hospitals, laundry facilities, waste disposal, pharmaceuticals, automotive industry, textile industry, catering sector etc.

Perforated trolley

Swivel castor with brake

Fixed castor

Options for the Transport trolley G®-TRANS:

Hinged lid and 2 toggle fasteners

Cylinder lock in both toggle fasteners

Hole for padlock (or seal) with a maximum shackle thickness of 6.5 mm available

All-round, flexible and abrasion-resistant PVC bumper

Embossing

Handle

Towing system

Special wheels for heavy loads or high temperatures

Undercarriage changes (wheel diameter, wheel arrangement, tyres)

Transport trolleys – versions for any purpose

Ergonomic – variable – efficient

Special solutions can be manufactured individually to suit customer requirements, even in small series. The trolleys shown are some examples of the solutions realised. Please do not hesitate to contact us.

Collapsible transport trolley

Transport trolley with hose connection

Transport trolley with removable plastic tray

Transport trolley with drawers

Perforated transport trolley with special towing system

Transport trolley with 3-part front panel and 2 divider walls

Light and ergonomic work

eliminates back strain and saves money
by increasing work efficiency

Our spring-loaded base trolleys ensure no strain is put on the back. The constant loading and unloading height allows loads to be removed or stacked ergonomically. Of course, your goods are also protected due to the lower height of fall.

TIP

- Improved ergonomics in the workplace through your employees complying with the constant loading and unloading height
- This back-friendly principle is an advantage for the health of your employees
- The spring force can be easily adjusted by the user to suit their own needs

Advantages of the G[®]-ERGO

- Constant loading and unloading height
- Many standard version available with various spring force
- The spring force can be easily adjusted by the user to suit their own needs
- Spring-loaded base does not tilt, even with one-sided loading
- Anodisation protects against abrasion and corrosion
- Extremely stable design due to metal joints with the latest technologies
- Swivel castors with brakes in accordance with European standard EN 1757-3

Spring-loaded base trolley G®-ERGO classic D 1408

Material: anodised aluminium

G®-ERGO classic
D 1408/180

- Smooth and anodised surface
- Walls and aluminium profiles are interlocked by means of clinching, making them extremely stable
- Smooth side walls reduce the friction of the load; the spring-loaded base trolley reacts immediately to any change in weight
- All-round, extremely stable profiles at the top and bottom on the rims of the trolley
- Parallel and torsion-free guidance of the drop-down floor by means of 8 covered ball bearings, even with one-sided loading
- Constant loading and unloading height; the weight of the load allows the base to continuously drop down. The base rises slowly when the trolley is unloaded
- Spring force: 25 kg
- Modification of the spring force and undercarriage is not possible
- No option available
- Stable undercarriage support made of galvanised steel
- Galvanised steel wheel housing, non-marking solid rubber wheels, roller bearings and thread guards
- Wheel arrangement D

Wheel arrangement D:
4 swivel castors

Spring-loaded base trolley G®-ERGO flex

Material: anodised aluminium

G®-ERGO flex D 1408
with fifth wheel, handle
and PVC bumper

- Smooth and anodised surface
- The spring force can be adjusted individually depending on the weight of the goods
- A flexible modulation of the spring force is possible at any time, this without tools nor major retrofit
- Intuitive handling
- Constant loading and unloading height even with goods of different weights
- Unique on the picking trolley market
- Patented technology
- Individual in size, spring force and other features
- The spring force can easily be adjusted by gently lifting the handle upwards and then sliding it
- Steplessly adjustable at any time before loading
- Spring-force from approx. 20 kg with a continuously adjustable setting range of approx. 50 kg

TIP

This spring-loaded base trolley is only available on request. That's why we can respond individually to your requirements and needs!

From the required spring force & size of the trolley to features such as handles, ladders, bumpers and wheels - whatever you can imagine is possible!

Steplessly adjustable spring force

Patented technology made by Gmöhling

G®-ERGO flex

Cupboard trolleys in all versions

The all-rounder for the highest demands

The Gmöhling cupboard trolley can do it all, regardless of where it is used. It has proven its reliability as a transport and storage trolley for dirty and fresh laundry and as a food trolley in the day-to-day work of hospitals and care homes all around the world. The cupboard trolley is used for the transport of sterilised materials and as medicine trolley.

The areas of use are extremely diverse, whether as an in-house tool trolley, a costume trolley for the theatre, opera, films and shows, a mobile office or for use in schools and public institutions.

The all-rounder - a thoughtful design down to the very last detail!

Advantages of the G[®]-CUP

- Anodisation protects against abrasion and corrosion
- Long service life due to high-quality workmanship
- High degree of stability with a low net weight
- Dustproof and splashproof
- Easy handling and ergonomic, even at maximum load
- Various internal and external trolley configuration available
- Swivel castors with brakes in accordance with European standard EN 1757-3

Cupboard trolley G®-CUP E 272

Material: anodised aluminium

- Anodised surface
- Walls and aluminium profiles are interlocked by means of clinching, making them extremely stable
- Open cupboard side with an all-round profile frame

G®-CUP
E 2721

- Two extremely rigid hinged doors, 3.0 mm thick, can be rotated through 270 degrees
- Open doors are secured by magnets
- Easy to use, one-handed, central twist lock ensures safely locked doors, even during transport by truck
- Good noise insulation and dust protection due to the all-round EPDM seal integrated onto the doors as well as the base and top profile
- Smooth interior with no indentations for easy handling and cleaning
- Ergonomic push/pull handles on both short sides
- All-round, abrasion-resistant, blue PVC bumper on the top and lower rim of the trolley
- 2 removable shelves create 3 evenly spaced storage compartments, each shelf can be loaded up to 100 kg equally distributed
- DIN A4 document frame on the inside of the door and DIN A7 on the short side of the trolley
- Torsion-resistant trolley undercarriage due to the BiTubAl® system
- Galvanised steel wheel housing, Supratech wheels, 200 mm wheel, polypropylene wheel centre, thermoplastic rubber tread, non-marking, precision ball bearings
- Wheel arrangement B

Wheel arrangement B:
2 swivel castors with
brakes and
2 fixed castors

G®-CUP E 272 – perfection down to the very last detail

- 8 Hinged doors**
- High rigidity due to the profiles
 - Can be rotated through 270 degrees
 - 3 mm thickness

- 2 Seals on the door frame and door**
- New integrated EPDM seal (tongue and groove system - also ideal for automatic washing facilities)

- 3 Bumpers**
- Replaceable, elastic blue PVC bumper on the top and base of the trolley
 - Top edging to secure the storage of small parts

- 4 Document frames**
- DIN A4 size inside on the right door
 - DIN A7 size outside on the right short side

- 5 Twist lock**
- Easy to use, centrally operated
 - Contact pressure against the door frame seal
 - Easy and secure locking, even in the case of overfilling
 - Doors do not spring open during transport by truck

- 6 Shelf supports**
- Made of polyamide

- 7 Door hinges**
- Continuously from top to bottom
 - Maintenance-free and silent due to the Teflon-coated hinge pins

- 9 Trolley undercarriage**
- Optimum torsional stiffness
 - High degree of stability due to the BiTubAl® frame (two tubular system profiles connected to the trolley undercarriage)
 - Adjustable wheel positions
 - Smooth running, even when trolleys are towed in train

- 10 Handles**
- Ergonomic handles in 2 versions
 - Combined push/pull handle on both short sides
 - Easy push handle
 - Pull handle ensures maximum safety at work

- 11 Magnets**
- For securing the open doors on both short sides

- 12 Undercarriage**
- 2 swivel castors with brakes and 2 fixed castors
 - Supratech wheels, 200 mm diameter wheel, precision ball bearings, thermoplastic rubber tread, non-marking
 - Many optional alternatives (e.g. for use in sterile areas)
 - Adaptable for AGV
 - Wheel positions can be adjusted

Real versatility

Options for Gmöhling standard cupboard trolleys

The areas of use are extremely diverse. They are also ideal as a tool trolley, costume trolley for theatre, opera, films and shows, a mobile office as well as for use in schools and public institutions.

Cylinder lock incl. 2 keys

Bracket to hold open the doors in washing facilities

Variable internal configuration with hanging rail and shelves

Swing down shelves

Swing down shelf with drop grid

Drill hole in the locking profile, e.g. for a seal or cable ties

Options for the cupboard trolley G[®]-CUP:

Embossing

Sliding sign with frame

Coloured epoxy coating

Doorless version with tarpaulin cover

Towing system for towing in train

Central brake and towing system

4 swivel castors, 2 of which are operated together with directional locking

Undercarriage for all Automated Guided Vehicle (AGV)

Combination of shelves and modular baskets

Special solutions for cupboard trolleys

Individual solutions for the design of the interior

Gmöhling cupboard trolleys have been used productively and proven successful for decades in hospitals, care homes, laundry facilities, industry and also in the service sector all around the world. They simplify the logistics, reduce costs and make work easier for the employees. Thanks to our many years of experience and flexibility, we realise special solutions to suit your individual requirements.

We design and optimise your supply chain solutions.

Costume trolley for film and theatre

Cupboard trolley with drawers and lid

Cupboard trolley with hanging rail and shelves

Kitting rack for electronic components

Cupboard trolley with swing down shelves and drop grid

Cupboard trolley for sterilising in autoclaves, on a container dolly

Cupboard trolley with drawers and crane lugs

Variable configuration

with ISO module baskets – for all purposes

Our modular cupboard trolley is specifically designed for ISO module baskets. You can freely select the configuration and fittings of these cupboard trolleys and adapt them to suit your individual requirements.

The reliable and easy handling of the modular system allows you to streamline logistics processes.

Is your desired size or configuration not in our wide standard range? Not a problem! We can also offer you small series.

Advantages of the G[®]-CUP ISO E 273

- Compartment height can easily be adjusted individually
- Suitable for all components of the 600 x 400 mm ISO modular system
- Flexible and versatile areas of use
- Anodisation protects against abrasion and corrosion
- Consistently designed to be easy to use
- Hygienic because the internal fittings are completely removable

Modular cupboard trolley G®-CUP ISO E 273

Material: anodised aluminium

- Anodised surface
- With 1, 2 or 3 rows of modules
- Each compartment contains 9 pairs of height-adjustable, antibacterial plastic rails and can be extended up to 18 pairs
- Internal design - vertical pillars and rails - completely removable if required, suitable for all components of the 400 x 600 mm or 400 x 300 mm ISO modular system
- Walls and aluminium profiles are interlocked by means of clinching, making them extremely stable
- High stability even with open door thanks to an all-round profile frame
- Two extremely rigid hinged doors, 3.0 mm thick, can be rotated through 270 degrees
- Open doors are secured by magnets

- Easy to use, one-handed, central twist lock ensures safely locked doors, even during transport by truck
- Good noise insulation and dust protection due to the all-round EPDM seal integrated onto the doors as well as the base and top profile
- Smooth interior with no indentations for easy handling and cleaning
- Handles on each short side
- All-round, abrasion-resistant, blue PVC bumper on the top and lower rim of the trolley
- DIN A4 document frame on the inside of the door
- Torsion-resistant trolley undercarriage due to the BiTubAl® system
- Galvanised steel wheel housing, Supratech wheels, 200 mm wheel, polypropylene wheel centre, thermoplastic rubber tread, non-marking, precision ball bearings
- Wheel arrangement B

Wheel arrangement B:

Our perfect 'logistics assistant'

Greater order, more space and a better overview -
on up to five levels

Whether order picking in e-commerce, in the industrial sector, in a workshop or in the healthcare sector, Gmöhling shelf trolleys always ensure an efficient workflow. They guarantee reliable transport, the intermediate storage of parts as well as order-based disbursement or portioning at the conveyor belt.

Always easily manageable and readily available everywhere, they reduce setup and transit times.

The trolleys are optimised for the use of open-fronted storage bins. This makes our trolleys an indispensable component in many processes in companies that bring clear improvements to internal workflows. The shelf trolleys are extremely stable with a low net weight.

Advantages of the G[®]-ORG

- Suitable for the transport of open-fronted storage bins (500 x 300 x 200 mm)
- Easy handling and ergonomic, even at maximum load
- Flexible, ideal when space is tight
- An optimum overview and direct access to the contents
- Very stable and high quality due to the welded shelves

Shelf trolley G®-ORG E 2801

Material: aluminium

- Smooth surface
- 4 permanently welded shelves create 5 evenly spaced storage compartments

G®-ORG

Hazardous goods packaging

in good hands when it comes to safety!

Safety regulations must be observed for the packaging, storage and transport of hazardous materials.

Gmöhling hazardous goods packaging (ADR)

has been approved by the Federal Institute for Materials Research and Testing (BAM) in Berlin as external packaging:

- For solid substances in the packing group I: high danger; specification mark X
- For solid substances in the packing group II: medium danger; specification mark Y
- For solid substances in the packing group III: low danger; specification mark Z

In accordance with international regulations

- European agreement concerning the international carriage of hazardous goods by road (ADR)
- Regulation for the international carriage of hazardous goods by rail (RID)
- International Maritime Dangerous Goods Code (IMDG)

Advantages of the G[®]-safe BOX

- Hazardous goods are transported safely and packed according to the regulations
- UN approval with X and Y certification
- Robust and dimensionally stable design
- Large variety
- Good dust and splash-water protection due to the integrated lid seal
- Reusable multi-trip packaging

Hazardous goods packaging

Aluminium transport boxes

More than 20 sizes in different model variants –
the right box for any requirement

Our aluminium crates are available in many sizes. They have important properties: lightweight, stable and durable. Your valuable objects are simply well packed for transport, storage and protection against external influences.

Transport box options:

Walls with beadings (ribs)

Spring-drop handle

Toggle fastener with an anti-crushing mechanism continuously protects the seal against deformation

Cylinder lock in the toggle fastener

Divider wall with plastic guide

Foam insert

Hole for padlock (or seal) with a maximum shackle thickness of 6.5 mm available

Hinges

Scratch-resistant surface

Add-on castor set from a length of 800 mm

Document frame

Lacquering

Special solutions for boxes and crates

Tailor-made solutions are our trademark!

Every industry has its individual requirements that cannot always be met with standard solutions. We will show you some examples from our decades of experience with successful projects in the following areas: healthcare, automotive industry, pharmaceutical industry, electrical industry, intralogistics, textile industry etc.

Gmöhling was the inventor of the world's first foldable box for the Berlin Airlift.

Please do not hesitate to contact us!

Lacquered universal box, lid with checker plate

Design box

Stacking container, extra long

Mobile transport box with a forklift pocket for long goods

Foldable stacking container

Stacking containers made of checker plate

Transport boxes for use as a storage rack

Transport box with window and moulded foam

Transport box with divider wall system and inlay

Storage and movement

The mobile box for easy and practical transport

The box can be moved easily and protects your contents against damage and the effects of the weather. The optimal solution for mobile transport impresses with its stability, low weight and scratch-resistant surface.

The roller box is equipped with 2 wheels and can even be transported easily when it is full.

Advantages of the G[®]-roll BOX

- Easy handling thanks to 2 castors
- Low net weight
- Robust and dimensionally stable due to the all-round beading
- Dustproof and splashproof
- Structured, scratch-resistant surface
- Stackable, even with castors

Roller box G®-roll BOX A 1599

Material:
Scratch-resistant aluminium

Add-on castor set consisting of a left and right castor

Hole for padlock (or seal) with a maximum shackle thickness of 6.5 mm available

Transport container, packaging and storage unit in one

Aluminium crates and baskets –
The ultimate for intralogistics.

Open crates and stacking baskets are particularly in demand for intralogistics. They are available with smooth or perforated walls and with trapezoidal beadings (ribs). We can also quickly realise your desired size, even in small quantities. Stacking baskets and open crates are perfect for optimising internal material flows.

They are suitable for transport and storage and can even be stacked as a storage rack. Lids are also optionally available.

TIP

You can find suitable
container dollies from page 86 - 91

Advantages of the G[®]-CRATE and G[®]-STACK

- Non-flammable, protection class 1
- Corrosion-resistant
- Low net weight
- Easy to clean
- Hygienic, sterilisable and odourless

Transport crate
G®-CRATE A 152

Material: aluminium

- Smooth surface
- All-round, extremely stable profiles on the top rim of the container and bottom ensure a durable container design
- Walls reinforced with all-round trapezoidal beadings (ribs)
- 2 ergonomic integrated handles
- 30 mm corner radius
- Stackable and match to pallet dimensions (see table for exceptions)

High-quality transport cases

for the special storage and transport of
valuable and sensitive goods

Our transport cases, also referred to as equipment cases, are specifically designed for the storage and transport of valuable and sensitive goods. These cases can be optionally fitted with foam blocks or pyramid foam to ensure that your products arrive safely at their destination.

Individual foam inserts on request.

Advantages of the G[®]-CASE

- Structured, scratch-resistant surface
- Safe storage and transport of valuable and sensitive products
- Corrosion-resistant
- Low net weight
- Can be equipped with foam blocks or pyramid foam

! TIP

- High degree of stability even for tools, measuring instruments and equipment
- Lockable with a combination lock or cylinder lock
- Model A 1539 stable version with a seal in the lid

Transport case
G®-CASE A 1539

Material:
Scratch-resistant aluminium

G®-CASE
A 1539/36

- Structured, extremely scratch-resistant surface
- All-round, extremely stable rim profiles on the case and lid ensure a durable case design
- Hinged lid and all-round rubber seal
- The lid can be removed if necessary
- Stable carry handle on the front
- 2 toggle fasteners with cylinder lock

TOP SECRET

... for the optimal and secure organisation of data disposal!

Gmöhling data disposal containers are available in different sizes and versions to ensure that even sensitive data and files are securely and optimally collected. Complying with the EU-General Data Protection Regulation (GDPR) up to security class 3.

Material subject to data protection can be collected in our data disposal containers, also referred to as file containers, and then transported for destruction as required by law. These containers can be equipped with various locking systems as required and naturally prevent unauthorised third party access to the data.

Advantages of the G[®]-DOCU

- Secure and optimum collection and disposal of sensitive data and files in accordance with the BSDG and GDPR.
- Lid with insertion slot to protect against unauthorised access
- A choice of various locking systems
- Easy handling and ergonomic, even at maximum load

Data disposal container G®-DOCU D 1009/80 and D 1009/120

Material: aluminium

- Smooth surface
- All-round, extremely stable rim profiles at the top and bottom ensure a durable container design
- Hinged lid with 2 straps and a 300 x 27 mm insertion slot with hand-entry guard
- 1 toggle fastener with cylinder lock
- 1 spring-drop handle on 2 sides
- 4 swivel castors, 50 mm diameter wheel, non-marking polyurethane wheels and plain bearings

Data disposal

Professional – Permanent – Efficient

The disposal containers are equipped in such a way as to enable the secure collection and disposal of data in accordance with the requirements of the EU-General Data Protection Regulation (GDPR) up to security class 3. Insertion slots with a hand-entry guard are just as much part of the professional features as robust fasteners and hinges as well as reliable locks.

Data disposal container options:

Insertion unit for G®-DOCU D 1009/240 for disposing of files; 405 x 100 mm insertion shaft with hand-entry guard; insertion slot function in the lid remains unaffected

Digital lock meets the requirements of security class 3

Combination lock

Insertion slot

Insertion shaft

Ergonomic handle

Embossing and/or consecutive numbering

Stacking corners

PVC bumper on the lid

Steel axle

Ergo version with ergonomic tilt angle

Wheel brake

Spring flap optionally with locking

Slam lock with deep embossing

Gravity lock

Which container meets my requirements?

Create your own disposal concept

Recycling is worth it ...for the sake of the environment

The Gmöhling waste and recyclable collecting station
helps you with waste separation

Waste separation is essential in the commercial and private sector. Conscientious recycling and reprocessing protects not only the environment but also keeps your costs down. The use of an anodised aluminium surface means that the container can be cleaned easily and is therefore suitable for hospitals, for instance.

For example, collect your recyclables in rest areas, production plants, waiting rooms, offices, kitchens etc.

Advantages of the G[®]-COLLECT

- 4 sizes - the right one for everyone
- Fire-resistant and odour-inhibiting
- Elegant appearance and perfect cleaning due to the anodised aluminium
- Maximum hygiene through easy use with a foot pedal
- Maximum mobility thanks to 4 swivel castors, 2 of which have brakes

Waste and recyclables collecting station G®-COLLECT X 2001

Material: anodised aluminium

- Anodised surface
- For collecting and separating waste and recyclables
- Collection container with 1 compartment
- One 45 l plastic container can be individually removed from each compartment
- Front-opening flap door opens with foot pedal
- Flap with blue plastic handle
- 1 door per compartment fitted on the rear side, each plastic container can be individually removed
- Hinged rear doors with magnetic catch
- Polypropylene wheels, 50 mm wheel, thermoplastic rubber tread, non-marking, precision ball bearings, electrically conductive
- Wheel arrangement D

Wheel arrangement D:
4 swivel castors, 2 of
which have brakes

Practical and elegant

For the consistent separation and correct disposal of waste

You can decide for yourself on the correct separation and disposal of waste with the 6 recycling pictogram labels: Organic waste, metal, glass, paper, plastic, residual waste.

Rear flap

Front-opening flap door

1 door per compartment on the rear side

Included in the delivery:

45 l plastic container

Organic waste

Metal

Glass

Paper

Plastic

Residual waste

A total of 6 adhesive labels for customer labelling with symbols for the following recyclables: organic waste, metal, glass, paper, plastic, residual waste

TIP

- Recycling protects not only the environment but also keeps your costs down!
- 4 different versions: 1 compartment, 2 compartments, 3 compartments, 4 compartments

Hygienic Disposal Container

Contactless insertion for maximum security

The Gmöhling aluminum container for an easy, hygienic disposal of disposable gloves and protective material. Available in 2 sizes, the container are flexible in use and place.

Because of their smooth surface they are more hygienic and quick to clean and disinfect.

Less spread of germs and viruses, as there's no air pressure from e.g. a falling lid for maximum safety.

Equipped with wheels and handles for an easy and ergonomic handling.

Advantages of the G[®]-DROP

- Less spread of germs and viruses, as there's no air pressure from e.g. a falling lid
- Contactless insertion for maximum security
- Hygienic, smooth surface for a quick disinfection
- Suitable for tearproof standard plastic bags (75µ+)
- Equipped with wheels and handles for an easy and ergonomic handling

TIP

- Flexible, can also be used for other purposes, e.g. for collecting disposable bottles

Disposal Container G®-DROP 80 und 240

Material: Aluminium

- Smooth surface
- All-round, extremely stable rim profiles at the top and bottom ensure a durable container design
- Hinged lid with 2 straps
- Circular opening hole Ø approx. 135 mm
- Toggle fastener with cylinder lock and 2 keys
- Interchangeable lid, can also be used for data disposal with another lid

The right choice for everyone!

Ideal for ballot papers up to DIN A4 size

The Gmöhling ballot box is perfect for general elections but also for elections or votes, such as at a workplace, club or school etc. The container can even be used for tombola and raffle draws.

The ballot box is made of sturdy aluminium. To prevent tampering, the boxes have a slot in the lid and can be locked; they can also be fitted with a seal.

The box is available in different versions - the right choice for everyone.

Advantages of the G®-VOTE A 1569

- Ideal for use in elections, tombola and raffle draws
- Robust container for many years of use
- Protects against unauthorised access
- Different versions - the right one for everyone
- Low net weight
- For the insertion of ballot papers up to DIN A4 size, even when folded

TIP

- The ballot box G®-VOTE A 1569/110 meets the requirements of section 51 of the Federal Elections Act
- The boxes have an insertion slot in the lid to prevent tampering
- Extremely durable and scratchproof due to the scratch-resistant aluminium
- Stackable, space-saving for transport and storage

Ballot box G®-VOTE A 1569/110

- Material: scratch-resistant aluminium
- Structured, extremely scratch-resistant surface
 - All-round, extremely stable profiles on the container rim, bottom and lid

- Hinged lid with 250 x 20 mm insertion slot and all-round rubber seal
- 1 toggle fastener with cylinder lock; drill hole for padlock with a shackle thickness of 6.5 mm or seals is possible
- 1 stable spring-drop handle on 2 sides
- 30 mm corner radius
- Stackable

Smart appearance

Ballot boxes suitable for towns and cities, authorities, companies and clubs. From small elections, such as club and work council elections to municipal elections, state elections or national elections. You will always make the right choice with Gmöhling!

Insertion slot in the lid

Protection against unauthorised access

Versatile, adaptable and convenient

these are the qualities of the universal serving trolleys

The Gmöhling multi-purpose trolley has a modular structure that has been thoughtfully designed down to the very last detail. You can choose between 2, 3 and 4 shelves. The height position and the number of shelves can also be subsequently changed. The shelves are available in 2 versions: aluminium or stainless steel.

Save transport costs!
We offer the serving trolley
as an efficient solution
for self-assembly.

Advantages of the G[®]-SERV

- Modular design available with a choice of 2, 3 or 4 shelves
- A choice of aluminium or stainless steel shelves
- Height position and number of shelves can be subsequently changed
- Practical for a wide range of uses

Serving trolley G®-SERV E 9501 A and E 9502 A with aluminium shelves

Material: anodised aluminium

- Modular design available with a choice of 2, 3 or 4 shelves
- Available in 2 sizes

- Anodised shelves
- Shelves with an all-round, raised profile rim made of anodised aluminium
- Shelves can be fully loaded up to 60 kg
- 25 x 25 mm square anodised aluminium pillar profiles on the short sides are also used as a handle
- Shelves screw to the handles
- 5 mounting positions allow for variable shelf spacing
- Grey bumpers with a diameter of 100 mm on each wheel
- Galvanised steel wheel housing, wheels with a thermoplastic rubber tread and plain bearings
- Wheel arrangement D
